8.20 A.M. Cumber to Lancaster to visit the Thayers.

John & I went to museum. had lunch, paintings and
inst. labels & 10 Ants' eggs. Bayard took me in his car

over his nurseries, where he has thousands of Chinese
trees & plants (willow). Then we three went over
Bayard's grounds, especially laid out at our expense.
It has an acre enclosed in a high brick wall, the inner
wall lined with grape vines in pergola in the center
a 1/2 grove of Elm trees, etc. especially in the center.
I was especially - Saw Ruth Thayer who was very cordial.
Returned & met Mrs. John Thayer. A nice pleasant lunch.
John Thayer, Mrs. Thayer & I walked over the place among
the trees to the old house where Mrs. Bayard lives. It is
being made over for John's family. Jack has a daughter.
The daughter, Mrs. Bayard, is a fine & beautiful woman. Saw
Mrs. Thayer. Looked over some trees. Goodbye. John

Rested this day. Took 12.19 Back Bay to Canton June.

May, Mrs. Rogers & Rob met me. I rose to leave. Rob showed
me where he was, sitting on 6 rush-bottomed chairs
in a room, got for Mrs. Rogers when she moved from
Boston in 1873. Six more were given away. He wants
to know where they are. After dinner we sat in the
sitting room & talked. Rob showed me plates
for the Paul Revere & Robert Steele of genealogies.
Rob took me over the new Rubber covered, 500
worth of. They rubberize cloth. I saw the work.
The old Paul Revere House has been torn down!
of course it had no value to the new owner.
Then we had a drive for an hour along
the Stoughton road and round to Canton June

Spurred Hawk ♂ & ♀

As I was walking to the Gymnasium, I had reached St. John's Church, I heard the continuous & excited calling of a Spurred Hawk. It was circling about some 50 or 60 ft up over Brattle & Ash Sts., uttering, its Kee-ee, Kee-ee, Kee-ee, Kee-ee-ee all the time. As I reached the front of the Greenleaf estate, the bird swooped to one of the tall trees on the right of the place and there I saw the mate, a larger bird sitting near the top of the tree. The male disappeared and the female swooped down from her perch soared over the lawn and then returned to the same spot. I continued my walk -

In a few seconds he flew and
alighted against the hole, thrust
in his head and introduced it with
empty bill. Then he flew off.
In a few seconds I saw him
drop to the lawn below the tree
and pick up something, a beetle
apparently. He flew to a limb
near the hole and repeated the
previous performance, and then
flew to the hole and fed the
young as before. Then he flew
off and I left. I did not see the young

This morning I went on to the lawn near the old pine and talked with the man. He has constantly seen 2 Sparrow Hawks about. He finds remains of many Sparrows under the tree.

Twice as I examined the hole with my glass I saw a young bird put his head up at the hole and look out for $\frac{1}{4}$ - $\frac{1}{2}$ min. or more.

Since I saw the ♀ Hawk seen & light in the Catalpa near the pine, with no food in bill. She finally flew to a more distant tree. I previously saw her fly onto the lawn - I was about $\frac{1}{2}$ hr. there.
